Github : github.com/AgnanToro | LinkedIn : linkedin.com/in/agnantoro

Informatics Engineering student at Sultan Agung Islamic University specializing in full-stack development with a keen interest in Artificial Intelligence. Skilled at transforming complex problems into simple, elegant solutions through clean code, collaboration, and user-focused design. Strong foundation in algorithms, data structures, and flexible team workflows.

SKILLS & PORTOFOLIO

- Languages: Java, JavaScript, TypeScript, PHP, C++, SQL
- Frameworks: Laravel, Vue.js, CodeIgniter 4, Bootstrap, Tailwind CSS, React.js, jQuery
- Tools: Git, Docker, MySQL
- Concepts: OOP, MVC Architecture, RESTful API, Authentication & Authorization, Agile/Scrum
- Skills: Team Collaboration, Communication, Problem Solving, Adaptability, Critical Thinking

EDUCATION

Bachelor of Informatics Engineering, Sultan Agung Islamic University

Sep 2023 - Present

- GPA : 3.78 / 4.0
- Relevant Coursework: Object-Oriented Programming, Algorithms and Data Structures, Database Systems, Software Engineering, Web Programming, Computer Networks, Human-Computer Interaction, Operating Systems, Computer Security, Cloud Computing, Artificial Intelligence, Digital Image Processing, Software Testing, Mobile Programming, Data Mining & Business Intelligence.

PROJECT EXPERIENCE

Helpdesk – Internal Ticketing & Maintenance System

Sep - Nov 2025

Full-stack Developer | Laravel(PHP), React (TypeScript), Vite, Tailwind CSS, MySQL, jsPDF

- Developed an end-to-end helpdesk system for ticket reporting, technician assignment, and progress tracking.
- Built multi-tab progress reporting (status updates, photo evidence, part orders, estimations).
- Implemented file storage, validation, PDF export, and automatic completion date logic.
- Created role-based access for Admin, Technician, and User.

Kick&Pay – Football Community Management Platform

Okt - Nov 2025

Full-stack Developer | Laravel (PHP), Vue.js, Inertia.js, Tailwind CSS, MySQL

- Fixed feature bugs and UI issues reported by QA to improve system stability.
- Improved the event creation flow by updating the minute options and date/time validation.
- Improved login flow, logic handling, and desktop responsiveness.

HCMS – Performance & KPI Management System

Sep - Okt 2025

Backend Developer | Laravel 10, Inertia.js, Vue.js, SCSS, JavaScript, MySQL

- Developed backend modules for reviewer management and performance period configuration.
- Improved validation, data structure, and workflow logic for KPI processes.

BlogSpace - Blog Management Application

Aug 2025

Full-stack Developer | Laravel 11 (PHP), Vue.js, MySQL, Tailwind CSS, Axios, Laragon

- Developed CRUD-based blog management system with categories, comments, and roles.
- Built admin panel for post moderation and approval workflow.
- Implemented clean routing, validation, and responsive UI components.

BUMDES SARIMARTA – Financial Management System

Jul - Aug 2025

Backend Developer | CodeIgniter 4 (PHP 8.2), MySQL, PhpSpreadsheet, DomPDF

- Developed and optimized database schema for hierarchical financial categorization and automated balance calculations.
- Implemented backend logic for financial report generation, including table and column additions to support expanded reporting needs.
- Integrated PhpSpreadsheet and DomPDF for multi-format (Excel/PDF) financial exports with secure authentication and CSRF protection.

SEA Catering – Healthy Meals Delivery Platform

Jun - Jul 2025

Full-stack Developer | CodeIgniter 4 (PHP), MySQL, Tailwind CSS, Alpine.js, Chart.js

- Built a subscription-based healthy meal delivery web app for the COMPfest Technical Challenge
- Developed customer and admin dashboards with subscription management, business analytics, and dietary preference customization
- Implemented secure role-based authentication, XSS/CSRF/SQL injection protection, and dynamic pricing with Chart.js integration

Islamic Inheritance Calculator

Jul 2025

Full-stack Developer | CodeIgniter 4 (PHP 8.2), MySQL 8.0, Tailwind CSS, JavaScript, Docker, TCPDF

- Developed a web application to automate Islamic inheritance distribution using Faraid (fixed shares) and Asabah (residual) systems with gender-based ratio (2:1).
- Designed a step-by-step interface guiding users from data entry to PDF report generation.
- Implemented advanced calculation algorithms with real-time validation and conditional rules handling.
- Deployed with Docker for consistent environments and integrated educational resources on Islamic inheritance law.

HM-TIF UNISSULA Student Organization Website

Apr - May 2025

Frontend Developer | React 18, Vite, React Router DOM, Bootstrap 5

- Developed and styled the footer component to align with the organization's branding and responsive design standards.
- Updated and optimized member profile photos across all departmental sections to ensure consistent visual presentation.
- Contributed to a comprehensive digital platform showcasing organizational structure, programs, and member profiles for HM-TIF UNISSULA.

EXPERIENCE

Lab Assistant – Object-Oriented Programming (OOP), Informatics UNISSULA

Sep - Jan 2026

- Assisted lecturers in guiding students during weekly OOP practical sessions.
- Helped students understand core OOP concepts such as classes, objects, inheritance, and polymorphism.
- Supported assessment, debugging sessions, and classroom discussions to improve learning outcomes.

Intern Back End Developer - Dafidea Technocraft

Sep - Dec 2025

- Supports web-based application development using Laravel for the backend and integration with Vue.js on the frontend.
- Participate in daily scrums and team discussions regarding project planning and implementation of the latest technologies.
- Using GitHub pull request workflow for version control and code review, and documenting development progress and changes using Jam.dev.

Full Stack Developer Intern – BID TIK Polda Jateng

Sep - Nov 2025

- Developed and enhanced the internal Helpdesk system using Laravel (backend) and React + TypeScript (frontend), including ticket management, admin validation, and technician assignment features.
- Designed and implemented the end-to-end business workflow (User → Admin → Technician), covering modules such as priority handling, automatic urgent-ticket assignment, and role-based access control (RBAC).
- Delivered project presentations to supervisors and stakeholders to demonstrate progress, gather feedback, and validate system improvements.

Event Coordinator – AI Training for Students, HMTIF UNISSULA

Aug - Okt 2025

- Leading the planning and coordination of the AI training event scheduled for September 2025.
- Organizing meetings, managing communications with stakeholders, and preparing logistics.
- Collaborating with speakers and teams to finalize the event agenda and materials.

Web Programming Competition Coordinator – Infinitera HMTIF UNISSULA

May - Jun 2025

- Organized a university-level programming competition with participants from various universities.
- Developed event timelines, coordinated the judging team, and managed the submission and evaluation process.
- Increased the number of participating teams by approximately 250%, demonstrating significant growth and heightened enthusiasm for the event.

Participant – Weekly AI/ML and Web Front-End Classes, GDGOC UIN Jakarta

Feb - Jun 2025

- Attended regular foundational classes in AI/ML and Web Front-End.
- Developed understanding of AI/ML and Web Front-End through consistent weekly sessions.
- Gained basic knowledge of AI/ML and Web Front-End from weekly classes.
